PROFESSIONAL SUMMARY

Business Intelligence Developer with 8+ years of experience in BI, reporting, and data analytics, with a focus on translating business questions and scattered data into decision-ready dashboards. Hands-on experience across Power BI, Tableau, WebFocus, SQL, DAX, Power Query, and dimensional reporting concepts. Skilled at working with stakeholders to understand reporting needs, define meaningful KPIs, validate data, and build clear analytical experiences for operational and leadership users. Recipient of Freedom Mortgage's High Flyer award for outstanding BI contributions.

CORE TECHNICAL SKILLS

BI & Visualization: Power BI, DAX, Power Query, Power Pivot, Tableau, WebFocus, Paginated Reports

Data & Reporting: SQL, T-SQL, PL/SQL, SQL Server, Oracle, data validation, reporting workflows, data transformation

Data Modeling: Dimensional modeling concepts, star schema, KPI design, relationships, reporting models

Other: Python, Azure, Power Platform, Agile/Scrum, requirements gathering, technical documentation

PROFESSIONAL EXPERIENCE

Power BI Developer / BI Consultant | Freelance, Remote Feb 2024 – Present

- Build Power BI and Tableau dashboards by first clarifying the business problem, intended users, and decisions the report needs to support.
- Transform and validate source data with Power Query and SQL, define reporting logic, and organize data into analysis-ready models based on project needs.
- Develop DAX measures, KPI views, drill-through experiences, and geospatial analysis to help users move from high-level trends to underlying drivers.
- Collaborate with stakeholders to refine requirements and translate business questions into practical dashboard workflows and reporting outputs.
- Review query and model design to improve report responsiveness, usability, and maintainability.

Business Intelligence Developer | Freedom Mortgage Inc., Cherry Hill, NJ Jan 2018 – Dec 2023

- Developed and supported enterprise BI reporting solutions used to provide operational and leadership teams with clearer visibility into business performance.
- Worked with business partners to understand reporting needs, clarify KPI definitions, and translate requirements into dashboards and recurring reporting solutions.
- Used SQL and BI tools to investigate source data, validate reporting logic, reconcile results, and identify data quality or definition issues before release.
- Supported reporting modernization and migration efforts across BI platforms, including WebFocus, Tableau, and Power BI-related reporting workflows.
- Partnered with cross-functional teams on deployment, access, production support, documentation, and reporting standards in an Agile environment.
- Shared BI development practices and reporting knowledge with team members; received the company's High Flyer award for outstanding contributions.

Data Analyst / Tableau Developer | American Mountinvest Holding Company, Bala Cynwyd, PA Oct 2016 – Dec 2017

- Developed Tableau and WebFocus dashboards using SQL-based reporting data to improve visibility into business trends and operational performance.
- Automated recurring reporting tasks with SQL and standardized report logic, reducing manual effort and improving consistency.
- Worked with users to clarify reporting questions and adjust dashboard views, filters, and metrics based on business needs.

Business Intelligence Developer | TMG Health Inc., Jessup, PA Jul 2015 – Oct 2016

- Used SQL to extract and prepare healthcare reporting data for stakeholder analysis and recurring BI deliverables.
- Collaborated with development and UAT teams to validate reporting results, investigate data discrepancies, and support reliable production releases.

SELECTED POWER BI & ANALYTICS PROJECTS

NYC FHV / TAXI OPERATIONS ANALYTICS DASHBOARD

- Built a Power BI dashboard to explore when and where trip demand changes, helping translate raw trip records into operational questions around peak hours, airport activity, and geographic patterns.
- Combined monthly trip data in Power Query, organized reporting fields and relationships, and created DAX measures for trip volume, duration, distance, and peak-hour analysis.
- Designed slicers and comparison views for month, borough/zone, airport activity, and weekday versus weekend behavior so users can move from trends to specific operating conditions.
- Focused the dashboard narrative on the decision question: where and when does demand appear strongest, and what factors explain the pattern?

HEALTHCARE ANALYTICS DASHBOARD

- Developed a Power BI dashboard to help users understand healthcare utilization, cost, and operational patterns through a clear KPI-to-detail analytical flow.
- Started with the stakeholder questions the report should answer, then mapped those questions to measures, filters, and visuals rather than designing charts in isolation.
- Used Power Query and DAX to prepare reporting fields, define measures, and create interactive views that support trend analysis and deeper investigation.
- Structured the walkthrough around business context, key findings, and potential actions to make the dashboard easier to explain to non-technical stakeholders.

INSURANCE FRAUD ANALYTICS DASHBOARD

- Built an interactive Power BI dashboard to investigate fraud patterns, high-risk claims, and geographic concentrations.
- Created DAX measures for fraud rate, claim amount, and claim frequency, with drill-through views to examine the records behind high-level KPIs.
- Designed the analysis around a risk question: which claim patterns deserve closer investigation and where are potential fraud hotspots concentrated?

RETAIL SALES & CUSTOMER ANALYTICS DASHBOARD

- Developed an executive reporting experience focused on sales performance, customer behavior, and product profitability.
- Created KPI measures, Top-N analysis, slicers, tooltips, and drill-through interactions to help users identify performance changes and investigate contributing products or customer segments.
- Applied dimensional reporting concepts to organize analysis and support a clearer path from summary KPIs to detailed business drivers.

SUPPLY CHAIN & INVENTORY ANALYTICS DASHBOARD

- Designed an inventory and supplier dashboard around operational questions involving inventory movement, fulfillment performance, and supplier reliability.
- Built measures for Inventory Turnover, Fill Rate, and Supplier Performance and used interactive filtering to identify areas requiring further review.
- Presented the dashboard as a decision-support tool for identifying potential bottlenecks and prioritizing operational follow-up.

EDUCATION & CERTIFICATIONS

M.S. Business Intelligence, Saint Joseph's University, Philadelphia, PA — 2015

B.S. General Management, Northwood University, Midland, MI — 2011

Certified BI Content Developer, SAS Institute Inc. | Tableau 10 Essential Certification
