PROFESSIONAL SUMMARY

Business Intelligence Developer with 8+ years of experience in BI, reporting, and data analytics, with hands-on experience across Tableau, WebFocus, Power BI, SQL, and enterprise reporting workflows. Skilled at translating business questions and scattered source data into decision-ready dashboards, defining meaningful KPIs, validating reporting logic, and building clear analytical experiences for operational and leadership users. Experienced in stakeholder collaboration, reporting modernization, data investigation, and dashboard development. Recipient of Freedom Mortgage's High Flyer award for outstanding BI contributions.

CORE TECHNICAL SKILLS

BI & Visualization: Tableau, WebFocus, Power BI, DAX, Power Query, Power Pivot, Paginated Reports

Data & Reporting: SQL, T-SQL, PL/SQL, SQL Server, Oracle, data validation, reporting workflows, data transformation

Analytics & Modeling: KPI design, dimensional modeling concepts, star schema, relationships, trend analysis, geospatial analysis

Other: Python, Azure, Power Platform, Agile/Scrum, requirements gathering, stakeholder collaboration, technical documentation

PROFESSIONAL EXPERIENCE

BI Developer / BI Consultant | Freelance, Remote Feb 2024 – Present

- Build Tableau and Power BI dashboards by first clarifying the business problem, intended users, and decisions the report needs to support.
- Transform and validate source data with SQL and Power Query, define reporting logic, and organize data into analysis-ready models based on project needs.
- Develop KPI views, drill-through and interactive analytical experiences, and geospatial analysis to help users move from high-level trends to underlying drivers.
- Collaborate with stakeholders to refine requirements and translate business questions into practical dashboard workflows and reporting outputs.
- Review query, model, and visual design to improve report responsiveness, usability, and maintainability.

Business Intelligence Developer | Freedom Mortgage Inc., Cherry Hill, NJ Jan 2018 – Dec 2023

- Developed and supported enterprise BI reporting solutions across Tableau, WebFocus, and related reporting workflows, providing operational and leadership teams with clearer visibility into business performance.
- Worked with business partners to understand reporting needs, clarify KPI definitions, and translate requirements into dashboards and recurring reporting solutions.
- Used SQL and BI tools to investigate source data, validate reporting logic, reconcile results, and identify data quality or definition issues before release.
- Supported BI platform modernization and reporting migration efforts, including analysis of existing reports, reporting logic, user needs, and transition workflows.
- Partnered with cross-functional teams on deployment, access, production support, documentation, and reporting standards in an Agile environment.
- Shared BI development and reporting practices with team members; received the company's High Flyer award for outstanding contributions.

Data Analyst / Tableau Developer | American Mountinvest Holding Company, Bala Cynwyd, PA Oct 2016 – Dec 2017

- Developed Tableau and WebFocus dashboards using SQL-based reporting data to improve visibility into business trends and operational performance.
- Built and refined interactive dashboard views, filters, and metrics based on user questions and reporting needs.
- Automated recurring reporting tasks with SQL and standardized report logic, reducing manual effort and improving reporting consistency.
- Worked directly with users to clarify analytical questions, investigate data, and adjust reporting outputs based on business feedback.

Business Intelligence Developer | TMG Health Inc., Jessup, PA Jul 2015 – Oct 2016

- Used SQL to extract, investigate, and prepare healthcare reporting data for stakeholder analysis and recurring BI deliverables.
- Collaborated with development and UAT teams to validate reporting results, investigate data discrepancies, and support reliable production releases.

SELECTED BI & ANALYTICS PROJECTS

NYC FHV / TAXI OPERATIONS ANALYTICS DASHBOARD

- Built an interactive BI dashboard to explore when and where trip demand changes, translating raw trip records into operational questions around peak hours, airport activity, and geographic patterns.
- Combined monthly trip data, organized reporting fields and relationships, and created KPI logic for trip volume, duration, distance, and peak-hour analysis.
- Designed filters and comparison views for month, borough/zone, airport activity, and weekday versus weekend behavior so users can move from trends to specific operating conditions.
- Focused the dashboard narrative on a decision question: where and when does demand appear strongest, and what factors explain the pattern?

HEALTHCARE ANALYTICS DASHBOARD

- Developed an interactive healthcare analytics dashboard to help users understand utilization, cost, and operational patterns through a clear KPI-to-detail analytical flow.
- Started with stakeholder questions, then mapped those questions to measures, filters, and visual analysis rather than designing charts in isolation.
- Prepared and validated reporting fields, defined KPI logic, and created interactive views supporting trend analysis and deeper investigation.
- Structured the dashboard walkthrough around business context, key findings, and potential actions for non-technical stakeholders.

INSURANCE FRAUD ANALYTICS DASHBOARD

- Built an interactive dashboard to investigate fraud patterns, high-risk claims, and geographic concentrations.
- Created KPI measures for fraud rate, claim amount, and claim frequency, with detail views to examine records behind high-level metrics.
- Designed the analysis around a risk question: which claim patterns deserve closer investigation and where are potential fraud hotspots concentrated?

RETAIL SALES & CUSTOMER ANALYTICS DASHBOARD

- Developed an executive reporting experience focused on sales performance, customer behavior, and product profitability.
- Created KPI views, Top-N analysis, filters, tooltips, and detailed interactions to help users identify performance changes and investigate contributing products or customer segments.
- Applied dimensional reporting concepts to organize analysis and support a clearer path from summary KPIs to detailed business drivers.

SUPPLY CHAIN & INVENTORY ANALYTICS DASHBOARD

- Designed an inventory and supplier dashboard around operational questions involving inventory movement, fulfillment performance, and supplier reliability.
- Built KPI logic for Inventory Turnover, Fill Rate, and Supplier Performance and used interactive filtering to identify areas requiring further review.
- Presented the dashboard as a decision-support tool for identifying potential bottlenecks and prioritizing operational follow-up.

EDUCATION & CERTIFICATIONS

M.S. Business Intelligence, Saint Joseph's University, Philadelphia, PA — 2015

B.S. General Management, Northwood University, Midland, MI — 2011

Certified BI Content Developer, SAS Institute Inc. | Tableau 10 Essential Certification
